

# Canvas Studio

Canvas Studio can be used to record poster and presentation videos that can then be downloaded as .MP4 files.

## How to Record with Canvas Studio

1. Login to Canvas
2. Click the **Studio** icon in the Global menu
3. Go to the top right corner, click **Record** and select **Screen capture**

This will launch the app and you will see a frame appear on your screen.

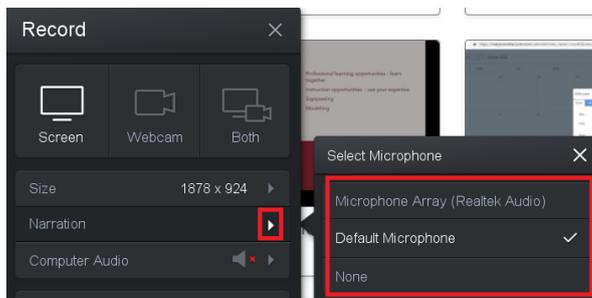

4. Open your presentation and press F5 to put it into Slideshow view
5. Everything within the frame will be captured, so adjust the frame accordingly

## Microphone

6. In the narration section, check that the green bars flash when you talk

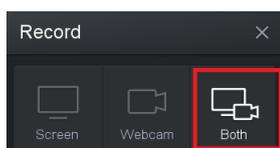

7. To change the default microphone, click the arrow and select the microphone you want to use

## Record Screen and webcam

1. Studio is set up to record content within the frame on your screen. If you want to include a video of yourself speaking, select Both

2. Talk through your poster or presentation and click arrow keys on your PowerPoint to navigate through animations and slides

# Canvas Studio

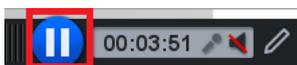

3. Press Rec to begin the recording

4. Talk through your poster or presentation and click arrow keys on your PowerPoint to navigate through animations and slides

5. When you have finished recording press the Pause button

6. From here you have options to playback the recording, delete the recording or if you are happy with the recording click Done

7. Enter a title for your recording and click Upload.

**Note:** You can also playback your recording and opt to Redo from here

Upload

Enter values below then click Upload button to start uploading.

Title

Description

**Upload**

Edit Redo Cancel

## Access and Download your poster or presentation video

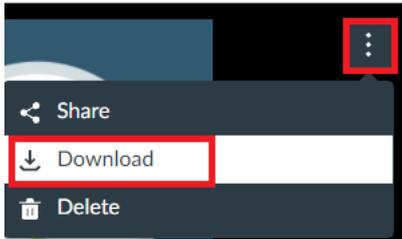

1. Login to [Canvas](#)
2. Click the Studio icon in the Global menu
3. Click View to open your recording

# Canvas Studio

4. Then click the 3 dot icon and select Download

Your presentation/poster recording will download as an MP4 video file.

**Note: If you are a Mac user and experience any issues with Canvas Studio, Canvas Support have advised that you contact them via the online chat so that they can help you there and then.**
