What are the student's strengths?

Jordan was able to recall appropriate special tests needed in joint assessment.

What would you like to see the student concentrate on, or develop, in the remainder of their time on placement?

I would like Jordan to believe in himself, he can be hesitant when he is unsure, although the majority of the time he knows the answer.

Jordan could develop his knowledge of adaptations for rehab exercises, by distinguishing the type of exercise he would give to different patients eg) elderly vs professional athlete.
